

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development, backend API design, cloud deployment, and system management. Skilled in building and deploying production-ready applications using Flask, Node.js, React, MongoDB, and AWS. Also experienced in AI/ML integration, IoT systems, and domain-driven academic projects.

KEY EXPERTISE

Full-Stack Web Development (React, Angular, Node.js, Flask) Backend API Design & REST Architecture
Database Design & Management (MongoDB, PostgreSQL, SQLite)
Cloud Deployment & DevOps (AWS, Docker, CI/CD, Google Cloud) Authentication & Security Implementation
AI/ML Integration (LSTM, GRU, CNN models) System Design & Debugging Production Deployment & Maintenance

EDUCATION

RV University B.Tech. - CSE - Artificial Intelligence and Machine Learning CGPA: 9.35 / 10	2023 - 2027
JYOTI NIVAS PU COLLEGE, Bengaluru 12 th PUE Karnataka Percentage: 94 / 100	2023
Narayana E-Techno School G B Palaya Bangalore 10 th CBSE Percentage: 91 / 100	2021

INTERSHIPS

NaArNi Manufacturing / Core Software Development Completed a 5-month Software Development Internship contributing to web application development. - Demonstrated strong analytical thinking, debugging skills, and structured problem-solving. - Collaborated with team members to deliver assigned development objectives on schedule	10 Jul, 2025 - 30 Nov, 2025
---	-----------------------------

PROJECTS

DreamNexx Group – Production Web Platform Team Size: 1 Key Skills: ReactJS NodeJS MongoDB REST APIs Deployment Google Cloud Platform Production Project Link: https://www.dreamnexxgroup.in/ Developed and deployed a production web platform for DreamNexx Group that supports real users and business operations. Worked on both frontend and backend using React and Node.js, and used MongoDB Atlas for data storage. Implemented a role-based system and designed APIs to handle different user workflows. Handled deployment using Vercel and Google Cloud Platform, and integrated Cloudinary for media storage. Also responsible for maintaining and updating the system in production. This experience helped me understand how real-world applications are built, deployed, and managed at scale.	15 Apr, 2025 - 02 Apr, 2026
Decentralized File Sharing DApp Team Size: 3 Key Skills: Blockchain Solidity ReactJS Ether.js Hardhat Web Develop Web3 development Project Link: https://github.com/bestorbust/decentralized-file-sharing Built a decentralized file sharing application using React and Solidity where users can upload and manage files securely. Used IPFS (via Pinata) for storing files and a smart contract to store file metadata on the blockchain. Integrated MetaMask using Ethers.js for wallet connection and transactions.	16 Apr, 2025 - 21 Apr, 2025

This project helped me understand how decentralized applications work, including smart contracts, blockchain interaction, and off-chain storage using IPFS.

PG Rent Management System

30 Oct, 2024 - 02 Nov, 2024

Team Size: 1

Key Skills: ReactJS jsPDF Front-End Web Development

Project Link: <https://genpdf.netlify.app/>

Built a web-based tool for a PG to automate the generation of rent receipts, deposit receipts, agreements, and vacating forms.

Used React and jsPDF to create dynamic multi-page PDFs based on user input. Implemented features like file uploads, conditional form rendering, and structured document formatting.

This project helped me understand how real-world admin tasks can be automated using frontend applications.

FixItHub – Community Issue Reporting Platform

Team Size: 4

Key Skills:

AngularJS Flask Python REST APIs Docker GIT Deployment DevOps Web Development Authentication

Project Link: <https://fix-it-hub-rho.vercel.app/>

Built a full-stack web application called FixItHub that allows citizens to report and track community issues like potholes, water leakage, and streetlight failures.

Worked on both frontend and backend using Angular and Flask, and used MongoDB Atlas for storing user and issue data. Implemented features like user authentication, issue reporting with location and images, commenting, voting, and an admin dashboard for managing issues.

Also worked on setting up CI/CD using GitHub Actions, where the project is automatically tested, built using Docker, and deployed. The frontend is hosted on Vercel and the backend on Render.

This project helped me understand how a complete system works end-to-end, including frontend-backend integration, database design, and deployment.

POSITIONS OF RESPONSIBILITY

Student Placement Coordinator (SPC) – RV University

Coordinated placement activities and supported recruitment processes between students and recruiters.

EXTRA CURRICULAR ACTIVITIES

- Active participation in academic and technical project development
- Practical exposure through internship collaboration and team-based development
